

REGULAR BOARD MEETING AGENDA
BOARD OF DIRECTORS MEETING
MALAGA COUNTY WATER DISTRICT
3580 SOUTH FRANK STREET
FRESNO, CALIFORNIA 93725
Tuesday, January 10, 2023 at 6:00PM

**REVISED
AGENDA**

In compliance with the Americans with Disabilities Act, if you need special assistance to participate in a District Board Meeting, please contact the District Office at 559-485-7353 at least 48 hours prior to the meeting, to ensure that reasonable arrangements can be made to provide accessibility to the meeting.

- ❖ Please submit all written correspondence for the Board of Directors by 12:00 pm the Friday prior to the meeting. Please deliver or mail to the District Clerk.
- ❖ Public comments are limited to three (3) minutes or less per individual per item, with a fifteen (15) minute maximum per group per item and will be heard during the communication portion of the agenda.

1. Call to Order:

2. Roll Call: President Charles Garabedian, Jr.; Vice President Salvador Cerrillo; Director Irma Castaneda; Director Frank Cerrillo, Jr.; Director Carlos Tovar, Jr.

3. Certification: Certification was made that the Board Meeting Agenda was posted 72 hours in advance of the meeting.

4. Old Business:

- a. **Selection of Director Positions.** Continued discussion of the tabled item from the last board meeting in December for the selection of the President and Vice-President positions.

Recommended action: board's pleasure.

Motion by: _____; **Second by:** _____

- b. **KYA Services.** Resuming conversation from the November 22 board meeting. The unfinished work has now been completed. An invoice of \$60,398.47 was submitted for the completion of the walking path at the park.

Recommended action: approve payment of \$60,398.47 to KYA Services, LLC.

Motion by: _____; **Second by:** _____

- c. **Per Diem.** Adjustment to directors per diem.

Recommended action: boards pleasure.

5. New Business:

- a. **ARPA.** The County of Fresno has awarded to the MCWD funds for the construction of a replacement well (Well 5A) at the Well 5 site. In addition, the

County of Fresno has awarded to the MCWD funds for the construction of a water storage tank at the Well 5 site. Design is proceeding on both projects. An environmental document is submitted for Board consideration and adoption.

Recommended Action: Adopt the Notice of Exemption attached. Direct staff to record the Notice of Exemption with the County and send it to the State Clearinghouse.

Motion by: _____; **Second by:** _____

6. Incorporation Reports:

7. Recreation Reports:

8. Engineer Reports:

a. District Engineer Report.

i. Drought Relief Grant Applications to the Department of Water Resources.

The Department of Water Resources has awarded to the MCWD funds for a replacement well (Well 3A) and a storage tank at the Well 3 site. Design is being finalized. The project is ready to advertise for construction as soon as a Rule 16 is received from PG&E. No action is required at this time.

b. CDBG Engineer Report: None for this meeting.

9. General Manager's Report:

a. Increasing Visibility of Homeless Population in Malaga.

b. Will Serve Letter for Malaga Power, 2611 E. North Ave, CUP 3748

10. President's Report:

11. Vice President's Report:

12. Director's Reports:

13. Legal Counsel Report:

14. Communications:

a. Written Communications:

1. Fresno Flood Control winter 2022 newsletter.

2. Fresno County has funding available to serve residents of the unincorporated areas in the county to address housing needs of residents experiencing or facing homelessness. Those who wish to provide comments may attend a meeting on January 11 at 6:00pm.

b. Public Comment: *The Public may address the Malaga County Water District Board on item(s) of interest within the jurisdiction of the Board, not appearing on the agenda. The Board will listen to comments presented; however, in compliance with the Brown Act, the Board cannot take action on items that are not on the agenda. The public should address the Board on agenda items at the time they are addressed by the Board. All speakers are requested to*

*wait until recognized by the Board President. All Comments will be limited to three **(3)** minutes or less per individual/group per item per meeting, with a fifteen **(15)** minutes maximum.*

15. Consent Agenda. The items listed below in the Consent Agenda are routine in nature and are usually approved by a single vote. Prior to any action by the Board of Directors, any Board member may remove an item from the consent agenda for further discussion. Items removed from the Consent Agenda may be heard immediately following approval of the Consent Agenda or set aside for discussion and action after Regular Business.

- a. Minutes of the Regular Board Meeting of December 13, 2022.
- b. Financial Statements and Account Payable Reports.

Recommended action: To approve the Consent Agenda as presented or amended.

Motion by: _____; **Second by:** _____

16. Closed Session:

- a. Pending Litigation (Gov't Code Section 54956.9)

17. Adjournment:

Motion by: _____, **Second by:** _____

Certification of Posting

I, Norma Melendez, District Clerk of the Malaga County Water District, do hereby certify that the foregoing agenda for the Regular Meeting of the Board of Directors of January 10, 2023 was posted for public view on the front window of the MCWD office at 3580 S. Frank Street, Fresno Ca 93725, at 12:00P.M. On 01/06/2023.

Project Name

Well 5A and Tank 2 Project

Project Applicant

Malaga County Water District (MCWD)

Project Location

Fresno County Assessor's Parcel No. 331-080-44ST, located on the east side of Peach Avenue between North and Central Avenues.

Project Description

The Malaga County Water District (MCWD; Water System No. CA1010042) proposes to remove and replace Well 5 and its accessory structures and other site improvements, which is currently inactive due to its inability to meet drinking water quality standards, with a new well (named Well 5A), as well as accessory structures and site improvements, on the same property as Well 5. The current water system requires all active wells working continuously, and this Project will serve to provide redundancy and allow other wells to go offline to allow for maintenance activities.

The Project would include a well, pump, discharge piping, valves, and appurtenances; 1 MG water storage tank, booster pump station, power and electrical cabinet for controls and switchgear; chlorination equipment; electrical service and transformer; site storm drain basin for site drainage and well pump-waste discharge pipeline.

The Project will be required to comply with all applicable regulatory requirements related to stormwater and wastewater discharges, all applicable San Joaquin Air Pollution Control District applicable rules and regulations, all applicable County of Fresno Well destruction requirements, and other applicable regulatory requirements.

Exempt Status:

Sec. 15302(c)

Sec. 15282(k)

Why Project is Exempt

The Project is statutorily and categorically exempt from CEQA pursuant to:

1. Guidelines § 15282(k), which exempts the installation of new pipeline or maintenance, repair, restoration, removal, or demolition of an existing pipeline as set forth in Section 21080.21 of the Public Resources Code, as long as the project does not exceed one mile in length.
2. Guidelines § 15302(c), which exempts the replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose

and capacity as the structure replaced, including the replacement or reconstruction of existing utility systems and/or facilities involving negligible or no expansion of capacity. The Project proposes to replace Well 5 with Well 5A to meet drinking water quality standards and to provide redundancy to the water system.

Due to the redundancy nature of the Project, no cumulative impacts will occur from successive projects in the same area. There is no reasonable possibility that the Project will have a significant effect on the environment due to unusual circumstances. The Project will not damage scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway. The Project site is not on any list compiled pursuant to Section 65962.5 of the Government Code. The Project will not cause a substantial adverse change in the significance of a historical resource.

RE: Will Serve for Malaga Power 140 MW BESS Project
Middle River Power
2611 E. North Avenue, Fresno, CA 93725
APN 330-050-027SU
Malaga County Water District

Dear Mr. Boyer:

As requested, this letter serves as a response to your written request for a will-serve letter for the expansion of the existing Malaga Power, LLC to incorporate a Battery Energy Storage System Project (BESS). The request for a will-serve included a project description dated July 2022.

The project site is located within the boundaries of the MCWD.

The MCWD took action at a regular Board Meeting of January 10, 2023 to provide a conditional will-serve letter for the proposed project. This conditional will-serve letter is valid through January 11, 2024. There are conditions associated with the will-serve letter as identified below:

1. The will-serve letters dated August 13, 2021 are hereby rescinded.
2. MCWD facilities shall be protected and accessible at all times.
3. It is understood that there are no proposed changes to the existing water and sewer services. If changes are proposed, the owner shall be required to submit improvement

plans, prepared by a Civil Engineer, for review and approval by the MCWD. The improvement plans shall identify all water and sewer improvements. The owner shall be responsible to construct all water and sewer service connections in accordance with MCWD Standards.

4. The developer shall be required to pay all applicable District fees in accordance with the rates in effect at the time of payment. If water or sewer improvements are proposed, District fees include a deposit of \$1,000 required for engineering, legal, and administrative fees. Upon receipt of the plans for review, the final fees will be determined. A copy of the current Master Schedule of Fees, Charges, and Recovered Costs is available at the District Office at 3580 S. Frank Street, Fresno, CA 93725.
5. Storm water shall not be discharged to the sanitary sewer system.
6. The applicant shall update the Application for a Non-Residential Wastewater Discharge Permit so that the information for the site is up to date.
7. The developer shall be required to pay all applicable District fees in accordance with the rates in effect at the time of payment.
8. The County of Fresno is the responsible entity for building permits.
9. The County of Fresno is the responsible entity for public safety services (Fire and Sheriff) and any conditions that will be placed on the development with respect to those services.
10. The development shall provide a schedule for the proposed construction.
11. The Fresno Metropolitan Flood Control District is the responsible entity for storm drainage facilities and transportation facilities, and therefore responsible for any conditions that will be placed on the development with respect to those services.

Sincerely,

Moises Ortiz, General Manager

cc: County of Fresno

Provost & Pritchard Consulting Group

Change comes to District's Board of Directors

The District bids a fond farewell to two long-time members of the Board of Directors, engineers Roy Spina and Mike Rastegar. Mr. Spina served as the lone City of Clovis appointee for 28 years, making him the longest serving Director in the history of the District. Mr. Rastegar was one of four Directors appointed by the City of Fresno, and he gave an impressive 17 years of service on the District Board.

Roy Spina

Mr. Spina had already retired twice - from military service and from Clovis Unified School District, when he was appointed to the Board in 1994. He then went on to give another full career's worth of public service in that capacity. As explained in the staff report to the Board honoring Mr. Spina upon his retirement, "For local government to serve its constituents effectively, it takes individuals who are willing to step up and serve the community selflessly, to truly be active and engaged with its constituents, and to fulfill their civic duties with character and civility. Director Spina has not only done this, but was truly an excellent Board Member who served with integrity, fairness and passion."

Mike Rastegar

Mr. Rastegar was appointed to the Board in 2005 while he was Deputy District Director for Caltrans. Upon his retirement from Caltrans in 2012, he continued his second career of serving on the Board. Mr. Rastegar's

engineering and financial knowledge was of great benefit to the District.

Sarge Green, City of Clovis

Sarge Green was appointed by the Clovis City Council to fill the seat held by Mr. Spina for 28 years. He is a part-time water management specialist with the California Water Institute and Center for Irrigation Technology at Fresno State. His previous efforts at the Institute and Center have included water policy facilitation, integrated regional water management studies, special water resource management reports and Director of the Center for Irrigation Technology until retiring from full-time employment in December 2020.

Before joining Fresno State's water programs Green was General Manager of Tranquillity Irrigation District in Fresno County and before that a senior scientist with the Central Valley Regional Water Quality Control Board. Prior appointments include serving as a member of the California Water Quality Monitoring Council and as Chair of the Water Quality Committee for the Association of California Water Agencies. He's currently a member of the Public Policy Institute of California, Water Policy Center research network and a Board of Director for the Tule Basin Land and Water Conservation Trust.

New City of Fresno appointee coming soon

Stay tuned for the announcement of who the City of Fresno will appoint to fill the Board seat left open by Mr. Rastegar's retirement.

Message from the General Manager

Peter Sanchez

Since the District's creation by voters in 1956, 86 individuals have served on the Board of Directors. They came from a range of professional backgrounds, and brought their knowledge and expertise to serve the people of Fresno and Clovis.

The District's unchanging mission is to protect lives and property from flooding, while being careful stewards of both water resources and

public funds. It is a small agency that does big things within a service area of 399 square-miles. About 75 employees manage the work required to maintain dams and reservoirs that protect downstream areas from foothill-borne flooding, and the urban storm drainage system of more than 150 stormwater basins and 740+ miles of pipelines that capture and keep rain that falls on Clovis and Fresno. In addition to these primary responsibilities, the District is the Fresno/Clovis lead agency on Clean Water Act stormwater pollution prevention, and also provides recreational space at more than 20 urban basin sites.

The first cover story in this issue talks about two recent Director retirements and one new appointment, with one more coming soon. Not every Board member should be a civil engineer, though that expertise is needed. Because the District's work involves much more than engineering, having varied expertise on the Board is important. Directors with backgrounds in banking, accounting, public relations, public service of various kinds, law, private enterprise of different types, agriculture, public policy, water resources, and much more, have all brought valuable perspectives to District leadership.

While Mr. Roy Spina's 28-year service record is unmatched, most Directors commit several years to leadership and use that time to develop a broad understanding of the District's purpose, funding, personnel structure and strengths, and the interconnected relationships across all sectors - public, private, non-profit, and residents. The desire to continue learning and a strong sense of civic duty are traits our Directors seem to share, regardless of their backgrounds, to the great benefit of the District's mission.

Stormwater recognized as a resource by the State

In *California's Water Supply Strategy - Adapting to a Hotter, Drier Future*, released by the Department of Water Resources in August 2022, increased stormwater capture

is listed among the key strategies to help California meet demand and deal with decreased water supplies over the next two decades and beyond. Listing stormwater as a valuable resource to be preserved and used, and not as a waste to be disposed of, is important to California making the most of its water.

Scarcity shapes the way resources are viewed, and what is viewed as a resource. It could be said that the Fresno/Clovis area's foundation in agriculture and that culture of practicality and stewardship also make it easier to see the value in something that others don't see. The engineers and draftsmen who designed the District's unique urban drainage and flood control system in the late 1950's and early 1960's created a system that treats stormwater as a resource, and built in capture and retention of the rain that falls on

the urban area. Stormwater is retained in the network of what is now more than 150 stormwater basins in Fresno and Clovis, giving it time to percolate through the soil and back into the aquifer our area relies upon for most of its water. The 15-year average for stormwater capture alone is 16,289 acre-feet, or enough water to cover 16,289 acres of land in one foot of water. In the November 7, 2022 Cal Matters story *'How can California boost its water supply?'*, the District's system is called out as an example of using stormwater as a resource, "In bone-dry 2021, storm flows accounted for almost all of the district's groundwater recharge."

Others are changing how they manage stormwater

All across California, communities are taking inventory and reassessing what water resources they have, and finding innovative ways to make the most of them. As the District shows with its system design and function, there is a significant community benefit to treating stormwater as a valuable natural resource to help secure local water supplies.

Board awards 2023 Clean Stormwater Grants

The District Board of Directors awarded \$30,000 to fund 13 local projects through its Clean Stormwater Program at the December 14, 2022 meeting. Funding is offered as reimbursement, in two tiers - up to \$2,000 for river field trips for schools and general priority grants, and up to \$4,000 for high-priority projects.

River Field Trip Grants – Provide funding for classes to visit the Scout Island Outdoor Education Center to learn about the water cycle, local water resources and quality, and the importance of keeping stormwater clean. Field trip grants were awarded to:

- Houghton-Kearney K-8 School, Central Unified
- Vang Pao Elementary, Fresno Unified
- Roeding Elementary, Fresno Unified
- Girl Scouts of America of Central California South
- Ahwahnee Middle School, Fresno Unified
- Sunset Elementary, Fresno Unified

General Grants – Projects must focus on one or more of these topics: stormwater quality and education, household hazardous waste information and education, stormwater pollution prevention assistance and education for businesses, environmental restoration, or enhancement and preservation. One general grant was awarded to:

- California Water Institute and California State University, Fresno

High Priority Grants – Projects must focus on one of these topics: urban trash reduction and elimination, Integrated Pest Management (IPM), Low Impact Development (LID), or, stream/river cleanup or restoration, or research related to stormwater pollutants. High priority grants were awarded to:

- U.S. Green Building Council
- Big Picture High School
- Sierra Resource Conservation District
- Boy Scouts of America, Troop 514
- Boy Scouts of America, Troop 301

The application period was from October 27 through December 1, and is open around the same time each year. Volunteer groups, environmental organizations, schools, neighborhood improvement groups and other not-for-profit associations were encouraged to apply. The grant program, established in 1997, helps fund local projects that help promote the District's stormwater pollution prevention goals. Projects must take place in the District's service area (generally the Fresno-Clovis metro area).

Visit www.fresnofloodcontrol.org/clean-storm-water-program/community-assistance/clean-storm-water-grants for more information.

New segment: 'Ask the Expert' mini-interview series

Our newest three-part segment features Terry Arko of the California Pool and Spa Association, who provides all the information one needs to properly, smartly, and safely drain a pool in Fresno or Clovis. He describes why proper drainage is important, what permits and permissions are necessary, and all other steps that are required in order to do the task correctly.

This is the fourth installment in the mini-interview series,

joining these segments:

- Impacts of Trash and Graffiti with Mark Standriff of Beautify Fresno
- Pest Management with Suzanne Bontempo of Our Water, Our World
- Wildlife with Adam Johnson of Fresno Flood Control

These continue to be short, sweet, and easily digestible, in order to be a ready resource to the public! All can be found on the [District's YouTube channel](#). Follow the Fresno Metropolitan Flood Control District on [Facebook](#) or [Instagram](#) to see and share these, and other upcoming videos!

Banners to bags - an upcycling success story

WE TURNED THIS...

BEFORE

INTO THESE!

AFTER!

Have you seen these around town?

The District runs an annual rainy-season campaign during which banners are placed all around town along the fences of stormwater basins. They are meant to help the public understand where water flowing through gutters goes (stormwater basins) and that any discarded pollution (such as trash) can negatively impact local drinking water resources.

By recycling the banners into bags, the District is able to divert waste from the landfill and continue sharing this important stormwater message through cool swag!

Keep an eye out for this year's new banners at a stormwater basin near you.

New Play-Safe matting at Trolley Creek Park

The playground at the District's Trolley Creek Park has gotten a flooring make-over. It was time to replace the spongy, rubbery Play-Safe matting that gives the playground areas protection against falling and also makes the play equipment accessible to park visitors who happen to use wheelchairs, crutches or other mobility assistance. No getting bogged down in sand or wood chips. Visitors can get right up to the play equipment and start having fun.

If you haven't visited Trolley Creek Park before, go! If you haven't been for a while, the park is asking about you and hopes you'll come back soon. It is located north of Kings Canyon Road on Huntington, east of Willow, tucked behind the Walmart store.

Get ready for bouncy playground fun - If you've never walked on Play-Safe rubber matting, give it a try. It's really fun.

Guest story: FEMA Risk Rating 2.0

Guest writer:
Bruce Bender,
*Risk Communication and
Outreach Consultant,
Bender Consulting Services, Inc.*

For more than 50 years, how FEMA determined the cost of an NFIP policy never changed much. It was centered on two main factors, which were based on a community's flood map. First, what flood zone was the building in. And second, how high was it above the predicted floodwaters (known as Base Flood Elevation, or BFE¹). If it was in a high-risk flood zone (e.g., Zone AE, VE), an Elevation Certificate (EC) was needed to provide a quote. If an EC didn't already exist, the property owner would have to hire a surveyor. This resulted in a costly, time-consuming path for a property owner to buy a policy.

FEMA needed to update the way flood insurance was rated. Rating needed to be more representative of the risk. Plus, it had to be done more quickly and at less expense to the property owner (i.e., no EC). So...enter Risk Rating 2.0 (RR 2.0). FEMA rolled out RR 2.0 for new policies on October 1, 2021. And on April 1, 2022, existing policies began renewing under RR 2.0.

FEMA designed RR 2.0 to better reflect a property's unique flood risk. The rating system is now easier and faster for insurance agents to provide quotes (e.g., an EC is no longer required, though it can still be used if it results in a lower cost). It includes more flood risk variables such as distance to and height above a flooding source. It uses more flood frequencies (not just the 1%-annual-chance flood) and more flood types (including heavy rainfall). It includes property characteristics like the cost to rebuild and height of the first floor above the ground.

Most homeowners insurance policies do not cover damage due to flooding. A separate flood insurance policy is needed. The majority of flood policies are written through the federal government's National Flood Insurance Program (NFIP), which was established in 1968. While it is available in more than 22,000 communities that have joined the NFIP, less than 5% of homeowners have an NFIP policy nationwide.

Two rating variables no longer used are the flood zone and BFE. However, NFIP communities still use flood maps (and ECs) for managing the floodplain. And lenders still use flood maps for determining if flood insurance is required. And while RR 2.0 uses a building's replacement

cost, the limits of coverage still are the same (e.g., \$250,000 building/\$100,000 contents for 1-4 family buildings).

Not basing rates on flood zones and BFEs has resulted in some changes. For example, the lower-cost Preferred Risk Policy (PRP) for properties in moderate-low risk zones is going away. Rates are no longer affected when new flood maps result in changes in flood zones or BFEs (i.e., no more grandfather rating). The exception is a one-time newly mapped discount is applied to policies newly identified to be in a high-risk zone (i.e., Zone X to Zone A). Community Rating System discounts now apply to all flood zones, not just high-risk (e.g., all policies in the cities of Clovis and Fresno get a 10% discount). Likewise, mitigation discounts apply in all flood zones.

There are many more things to know about RR 2.0. You are encouraged to talk to your insurance agent for additional details. You also can visit FEMA's RR 2.0 webpage (www.fema.gov/flood-insurance/risk-rating). To learn more about flood insurance, visit www.FloodSmart.gov.

¹Base Flood Elevation - The elevation of surface water resulting from a flood that has a 1% chance of equaling or exceeding that level in any given year (sometimes called the "100-year flood").

The completion of the District's Redbank Fancher Creeks Project in the early 1990's and the substantial completion of the Fancher Creek Detention Basin in the early 2010's and subsequent flood map revisions allowed thousands of properties within the District to be removed from the highest risk flood zones and save significantly on annual flood insurance premiums. The implementation of Risk Rating 2.0 may impact the flood insurance premiums on some properties within the District.

What a difference 30 years makes

Highs and lows

In the last issue of *Flood Line* we talked about how District groundwater recharge totals for the last water year were the lowest on record. The recharge graph told the story of variability in rainfall and recharge performed over the past 15 years and showed that though totals are low during some years (19,873 acre-feet in 2015, and the very low 12,688 acre-feet in 2021), they are very high in other years (68,782 acre-feet in 2017, and 68,095 acre-feet in 2019).

Because rainfall varies wildly in our semi-arid region, it is important to have an urban drainage and flood control system capable of handling large volumes of water no matter when or how they show up – as rain, or as diverted Kings River surface water. The District's urban and rural systems were designed with capability to capture and contain water to protect lives and property and hold that water to allow time for it to soak through the soil and recharge the groundwater aquifer, or move it to other local sites for that purpose. Recharge of river water during the summer months is made possible through pipeline connections to the Fresno Irrigation District's (FID) canal system.

Groundwater recharge capability grows over time

For some perspective on changes in system recharge capability, we looked back at what was happening with dry season recharge in the District's urban storm drainage system in 1992. That year, staff reported to the District Board that

the 1991 water year saw 20,116 acre-feet of recharge and explained that was the third highest total to date. There were 31 stormwater basins used to recharge that water, of the 44 that were intertied to FID's canal system to allow diversions for dry season recharge. At that time, stormwater routed to basins after rain was estimated but not measured, so the recharge total reflects only dry season recharge.

This year's report to the Board showed that due to persistent drought just seven basins were used for recharge in the 2021 water year, of the 98 basins that are now intertied to FID canals. The dry season-only recharge total in those basins was a depressing, record-breaking low of 1,038 acre-feet.

Today there are more than twice the number of urban stormwater basins (98 compared to 44) ready to accept and recharge dry season surface water diversions, and more than 150 basins total that can capture rainfall. This gives the system huge flexibility in capturing and keeping water when it does show up again. During times of heavy snow melt originating in the Sierra Nevada, there are more basins to divert water to for dry season recharge of runoff that feeds the Kings River. During future heavy rain years, there is much more room to catch and hold stormwater.

“Today there are more than twice the number of urban stormwater basins...ready to accept and recharge...surface water”

Neighboring infrastructure - A Fresno Irrigation District canal adjacent to and connected via pipeline to an FMFCD stormwater basin (Nielsen & Teilman, in southwest Fresno)

More to come

Drainage system planning, pipeline construction, and basin excavation are done ahead of planned development within the Cities of Clovis and Fresno and happens incrementally over time. As new building continues, new urban storm drainage infrastructure will be built to serve new neighborhoods and businesses. Increased capacity for groundwater recharge is one of the publicly funded benefits, in addition to stormwater capture to prevent localized flooding.

Close Up: Shauna Espinoza-Mendoza

Engineer Shauna Espinoza-Mendoza and her husband Luis

Shauna Espinoza-Mendoza is a new, not-new employee who has joined the District's Development Review team. Shauna worked at the District from 2003-2006, shortly after she graduated from Fresno State. She wanted to gain some design experience in the private sector to obtain her Civil Engineering license, and she did just that. She returns to the Dis-

trict as a Registered Civil Engineer.

In addition to earning her RCE, she worked for about five years in the private engineering sector. However, she had always wanted to teach math and decided to then earn her teaching credential. She then spent the next 10 years teaching, five years in Central Unified School District and five years in Selma Unified. She had her own class for eight years; six year in middle school, and two years in high school. Shauna started the Robotics Club Team at Selma High School, where they took 4th place their first year.

As she progressed in her new career and earned her Master's in Education, the next logical step was administration. She instead decided to look again at engineering. Now-retired District Engineer Jerry Lakeman had asked her in 2006 if she was sure she wanted to leave the District, and told her she could always come back. She says she remembered her time at the District fondly, "I specialized in water resources and wanted to come back to my roots of what I enjoy doing."

Fortunately for the District, Shauna decided to apply and started again in July 2022. When asked if there is anything that stands out to her so far, she said, "Most everything has moved from being on paper to being digital. I've only seen one set of paper plans since I've been here. Plan review is now done digitally." She said something that hasn't changed is that "...everyone is helpful, kind and supportive, which makes for a great working environment."

"We are happy to have Shauna back at the District working in the Development Review Department. She has already had an impact on the department and we look forward to all that she has to offer," says Jason Clarke, Development Services Manager.

Shauna and her husband Luis will celebrate their fifth anniversary in March. They have two dogs, two cats and two foster cats that they expect will become permanent. She enjoys knitting with her mom, reading, and she and Luis love to vacation in Morro Bay.

HOME-ARP **item 14.a.2**

To RSVP please
email or call:

Comdev@fresnocountyca.gov

559-600-4292

Fresno County has funding available to address housing needs of residents experiencing or facing homelessness.

The funding is available to serve residents of the unincorporated areas of Fresno County, as well as the 7 participating cities:

- Fowler
- Kerman
- Kingsburg
- Mendota
- Reedley
- Sanger
- Selma

We'd like your input.

Please join us for this meeting on:
January 11th, 2023@6:00 PM

Location:

Fresno County Plaza 8th Floor
Conference Rm A
2220 Tulare St. Fresno, CA 93721

You may also join the meeting via
teleconference or Microsoft Teams:

(559) 494-4226

Meeting ID: 454 410 922#

Microsoft Teams

<https://tinyurl.com/8tkehbfz>

All interested parties are invited to participate to help identify the best way to utilize the HOME-ARP funds to address the needs of the homeless and residents at risk of homelessness in Fresno County and its seven participating cities.

REGULAR BOARD MEETING MINUTES
BOARD OF DIRECTORS MEETING
MALAGA COUNTY WATER DISTRICT
3580 SOUTH FRANK STREET
FRESNO, CALIFORNIA 93725
Tuesday, December 13, 2022 at 6:00PM

item 15.a.

In compliance with the Americans with Disabilities Act, if you need special assistance to participate in a District Board Meeting, please contact the District Office at 559-485-7353 at least 48 hours prior to the meeting, to ensure that reasonable arrangements can be made to provide accessibility to the meeting.

- ❖ Please submit all written correspondence for the Board of Directors by 12:00 pm the Friday prior to the meeting. Please deliver or mail to the District Clerk.
- ❖ Public comments are limited to three (3) minutes or less per individual per item, with a fifteen (15) minute maximum per group per item and will be heard during the communication portion of the agenda.

1. Call to Order: 6:05PM

- 2. Roll Call:** President Charles Garabedian, Jr.; Vice President Salvador Cerrillo; Director Irma Castaneda; Director Frank Cerrillo, Jr.; Director Carlos Tovar, Jr.
Not Present: President Charles Garabedian, Jr.
Also present: Neal Costanzo, Norma Melendez and Moises Ortiz.

- 3. Certification:** Certification was made that the Board Meeting Agenda was posted 72 hours in advance of the meeting.

- 4. Old Business: none for this meeting.**

5. New Business:

- a. **Oath of Office.** Members re-elected on 8 November 2022 to take Oath of Office.

Recommended action: for re-elected board members to take Oath of Office and selection of President and Vice-President positions.

Re-elected board members took the Oath of Office. Selection of president and vice president was tabled for the next board meeting in January.

- 6. Sheriff Report:** Presented by CSO, Elaine Montoya.
CSO, Elaine Montoya, reported some of the crimes that occurred in the community of Malaga and its surrounding area.

Director Tovar Jr. excused himself at 6:11pm.

- 7. Incorporation Reports: None for this meeting.**

8. Recreation Reports:

Director Tovar, Jr. resumed the board meeting at 6:40pm.

Vice President Cerrillo reminded the board members of the Christmas program of December 17. All children will receive a toy, even those who signed up for Toys-for-Tots

as it is unknown if the organization will deliver gifts before recreation's Christmas program.

Director Castaneda reported that food was given out for free to those who attended the recreation committee's bingo night.

9. Engineer Reports:

- a. District Engineer Report. **None for this meeting.**
- b. CDBG Engineer Report: **None for this meeting.**

10. General Manager's Report: None for this meeting.

11. President's Report: absent.

12. Vice President's Report:

Vice President Cerrillo wishes everyone a Merry Christmas and states that 2023 will be Malaga's year of incorporation.

13. Director's Reports:

Director Castaneda, Tovar, Jr. and Cerrillo, Jr. Wish everyone and the District staff a Merry Christmas and Happy New Year.

14. Legal Counsel Report: None for this meeting.

15. Communications:

- a. Written Communications: **None for this meeting.**
- b. Public Comment: *The Public may address the Malaga County Water District Board on item(s) of interest within the jurisdiction of the Board, not appearing on the agenda. The Board will listen to comments presented; however, in compliance with the Brown Act, the Board cannot take action on items that are not on the agenda. The public should address the Board on agenda items at the time they are addressed by the Board. All speakers are requested to wait until recognized by the Board President. All Comments will be limited to three **(3)** minutes or less per individual/group per item per meeting, with a fifteen **(15)** minutes maximum.*

16. Consent Agenda. The items listed below in the Consent Agenda are routine in nature and are usually approved by a single vote. Prior to any action by the Board of Directors, any Board member may remove an item from the consent agenda for further discussion. Items removed from the Consent Agenda may be heard immediately following approval of the Consent Agenda or set aside for discussion and action after Regular Business.

- a. Minutes of the Regular Board Meeting of November 22, 2022.
- b. Financial Statements and Accounts Payable Reports.

Recommended action: To approve the Consent Agenda as presented or amended.

Motion by Director Castaneda; Second by Director Cerrillo, Jr. and by a 4-0 vote to approve the consent agenda as presented.

17. Closed Session: None for this meeting.

18. Adjournment:

Motion by Director Castaneda, Second by Director Tovar, Jr. and by a 4-0 vote to adjourn the meeting at 6:51pm.

Certification of Posting

I, Norma Melendez, District Clerk of the Malaga County Water District, do hereby certify that the foregoing minutes for the Regular Meeting of the Board of Directors of December 13, 2022 was posted for public view on the front window of the MCWD office at 3580 S. Frank Street, Fresno Ca 93725, on 01/11/2023.

Norma Melendez

Norma Melendez, District Clerk
